Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, and 23-24, drawn to a pseudo-3D clothes coordination method (US class 345/419).

Group II, claim(s) 18-22, drawn to an online service method of using a pseudo-3D total clothes coordination (US class 705/26).

Group I v. Group II:

Group II requires preparing a 2D standard avatar image, a standard 2D image and a pseudo-3D image; providing a user information; generating a pseudo-3D user-adapted avatar image by correcting the 2D standard avatar image automatically based on the user information; and performing an automatic coordination corresponding to the user information by converting the standard 2D image to a pseudo-3D coordination image automatically in response to the corrected pseudo-3D user-adapted avatar image, not required by Group I. Further, Group II requires enrolling as a seller member on a service website; registering a selling item; creating a standard 2D image of the registered item; installing ActiveX by inserting an HTML code of the pseudo-3D user-adapted coordination program using artificial intelligence on the service website; displaying a coordination of the selling item according to a coordination request of a

user on the coordination program; processing a purchase request of the user for the displayed coordination image; and dividing profits from the item, that distinguishes it from Group I.

Accordingly, unity of invention is lacking for Groups I and II because such Groups are not so linked as to form a single general inventive concept.

Conclusion

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
